TABLE OF CONTENTS

○ OUR HISTORY

Information Technology Era nowadays has proved the dependence of each individual and institution or company regarding the importance of Communication and Information Technology.

Our 15 years of experience in the Communications and Information Technology field–national and multinational companies–gives us the credentials in planning, implementing, maintaining, and maximizing a good, secure, and precise system from a small company to a well-established company. From our experiences thus far, we have proven that a correct implementation of a standardized IT system will simplify the use, reducing the maintenance cost, also maximizing the security and effectiveness of the system itself.

Nonetheless, some companies still have not put the best use of their IT systems and devices. Typically caused by the lack of a well-planned IT system, standardization, undocumented, and the absence of human resources. Departing from these experiences, we determined to establish a company that will assist you to plan, build, maintain and maximize new or existing IT systems in your company. Our various Services and Products offering are expected to be able to meet these challenges, to put the best use of your company's IT system.

In conclusion, we exist to be your best partner in answering the needs and overcome the problems in Communication and Information Technology area in accordance with our experience and expertise.

Sincerely,
PT. Nexanet Nusantara Berjaya
